

## AI Agent Development/Test/Evaluation, ML/DL Modeling, Full-Stack Engineering

2+ years work experience (US/International); 4+ years research and programming experience.

### EDUCATION

<b>Ph.D. Student in AI for Geosciences</b>	<b>University of Texas at Austin</b>	2024 – expected May 2029
GPA 3.9/4.0   TA for 1,000+ students (4.5/5.0 instructor rating)		
<b>B.S. in Geosciences (Honors Class)</b>	<b>University of Science and Technology of China</b>	2020 – 2024
Nominee of the <b>Highest Honor</b> for USTC undergrads (one of the two ESS School nominees) Founded one of the largest student clubs, grew from 0 to 1,300+ members. <a href="#">[News]</a>		

### WORK EXPERIENCE

<b>AI Intern, AI Agent Knowledge Base Evaluation</b>	PineAI (Singapore)   Remote   Jul. 2025 – Aug. 2025
• Implemented multi-dimensional evaluation system from scratch for PineAgent's RAG knowledge base.	
• Developed data sanitization module removing 2,000+ PII entries and noise from 1,000+ call sessions.	
• Extracted 3,000+ Q&A pairs (knowledge/method/strategy) from call sessions to form the evaluation dataset.	
• Deployed concurrent LLM-as-judge + rule-based engine, measuring P/R/F1 to enable RL optimization.	
<b>Full-Stack Intern, LLM Text Processing System</b>	ZaiwenAI   Beijing, China   Jun. 2025 – Jul. 2025
• Acted as multiple roles in the startup, from design to deployment. <a href="#">[Code]</a> (non-company business) <a href="#">[Demo]</a>	
• Developed 3-module MVP: LLM-footprint detection, removal, and plagiarism checking for researchers.	
• Built a RESTful backend with FastAPI and an asynchronous task queue with Celery + Redis.	
• Created a Vue.js frontend with 9-format document upload, SSE-based real-time LLM response streaming.	
<b>Research Assistant, ML Model Development</b>	UT-Austin   Austin, TX   Aug. 2025 – Present
<b>Project Admin, High Performance Computing Allocation</b>	NSF NCAR   Remote   Aug. 2025 – Present
• Integrated machine learning parameter calibration for a SOTA physics-based land surface model (Noah-MP).	
• Enhanced efficiency of traditional Monte Carlo parameter calibration with a scikit-learn framework.	
• Applied for and funded by the NSF NCAR's 1k GPU hrs, 22k CPU hrs high performance computing allocation.	
<b>Visiting Scholar, High Altitude Observatory</b>	NSF NCAR   Boulder, CO   Jul. 2023 – Dec. 2023
• Simulated global atmospheric wave propagation, detecting 2 distinct wave modes from Hunga-Tonga eruption.	
• Integrated simulation/observation via wavelet analysis, advancing understanding of extreme volcanic events.	
• First-authored presentation at a NASA Science Workshop and AGU Meeting. <a href="#">[Code]</a> <a href="#">[Abstract]</a>	
<b>Full-Stack Developer, UT01 Navigation Page</b>	Independent   Hybrid   Jun. 2025 – Present
• Consolidated 80+ campus resources across 11 categories based on student navigation patterns. <a href="#">[Code]</a> <a href="#">[Website]</a>	
• Drove 10,800+ visits through SEO optimization; optimized HTML/SCSS frontend for cross-device compatibility.
