AI Agent Development/Test/Evaluation, ML/DL Modeling, Full-Stack Engineering
2+ years work experience (US/International); **4+** years research and programming experience.

EDUCATION

Ph.D. Student in AI for Geosciences University of Texas at Austin 2024 – expected May 2029
  GPA 3.9/4.0 | TA for 1,000+ students (4.5/5.0 instructor rating)
B.S. in Geosciences (Honors Class) University of Science and Technology of China 2020 – 2024
  Nominee of the **Highest Honor** for USTC undergrads (one of the two ESS School nominees)
  Founded one of the largest student clubs, grew from 0 to 1,300+ members. [News]

WORK EXPERIENCE

AI Intern, AI Agent Knowledge Base Evaluation PineAI (Singapore) | Remote | Jul. 2025 – Aug. 2025
- Built an evaluation system from scratch for multi-dimensional assessment of PineAI Agent's knowledge base.
- Developed a data sanitization module removing 2,000+ PII entries and noise from 1,000+ call sessions.
- Extracted 3,000+ Q&A pairs (knowledge/method/strategy) from call sessions to form the evaluation dataset.
- Implemented a 5-dimensional evaluation engine using LLM-as-a-judge method with concurrent processing.

Full-Stack Intern, LLM Text Processing System ZaiwenAI | Beijing, China | Jun. 2025 – Jul. 2025
- Acted as multiple roles in the startup, from design to deployment. | [Code] (non-company business) [Demo]
- Developed 3-module MVP: LLM-footprint detection, removal, and plagiarism checking for researchers.
- Built a RESTful backend with FastAPI and an asynchronous task queue with Celery + Redis.
- Created a Vue.js frontend with 9-format document upload, SSE-based real-time LLM response streaming.

Research Assistant, ML Model Development UT-Austin | Austin, TX | Aug. 2025 – Present
Project Admin, High Performance Computing Allocation NSF NCAR | Remote | Aug. 2025 – Present
- Integrated machine learning parameter calibration for a SOTA physics-based land surface model (Noah-MP).
- Enhanced efficiency of traditional Monte Carlo parameter calibration with a scikit-learn framework.
- Applied for and funded by the NSF NCAR's 1k GPU hrs, 22k CPU hrs high performance computing allocation.

Visiting Scholar, High Altitude Observatory NSF NCAR | Boulder, CO | Jul. 2023 – Dec. 2023
- Simulated global atmospheric wave propagation, detecting 2 distinct wave modes from Hunga-Tonga eruption.
- Integrated simulation/observation via wavelet analysis, advancing understanding of extreme volcanic events.
- First-authored presentation at a NASA Science Workshop and AGU Meeting. | [Code] [Abstract]

Full-Stack Developer, UT01 Navigation Page Independent | Hybrid | Jun. 2025 – Present
- Consolidated 80+ campus resources across 11 categories based on student navigation patterns. | [Code] [Website]
- Drove 10,800+ visits through SEO optimization; optimized HTML/SCSS frontend for cross-device compatibility.
